

```
class Animal{
    protected void display(){
        System.out.println("I am an animal");
    }
}
public class InheritanceEx extends Animal
{
    public static void main(String[] args) {
        InheritanceEx dog =new InheritanceEx();
        dog.display();
        //System.out.println("Hello World");
    }
}
```
