```java
public class ThrowEx2
{
    public static void checkNum(String n){
    if(n==null){
        throw new NullPointerException("\n null was given");
    }

}
        public static void main(String[] args) {
                ThrowEx1 o = new ThrowEx1();
                o.checkNum(null);
        }
}
```
